

ABSTRACT OF THE DISCLOSURE

A system 10 for providing logistics for a sale of goods over a computer network.

The system 10 is effective to provide financial logistics for a sale and transfer of goods
5 between a seller and a remote buyer, and may be implanted so that at least a portion of
the proceeds of the sale is transferred to a third party, such as a charitable or nonprofit
entity. The system 10 allows the sale and transfer to occur in a manner that does not
require interaction between the seller and buyer. The system 10 may further conduct the
sale using an auction or raffle process.
